AILA (Registered landscape architect)

SUMMARY OF EXPERIENCE

Through the course of his career John has work on projects across an array of sectors, spanning from residential gardens to city-scale urban design projects. His experience has seen him manage projects from concept development through to construction, delivering works that realise the vision and expectations of the client.

John's recent experience has been in masterplanning and residential estate development, where he is managing a team to coordinate high level planning approvals through to delivering works on the ground. His role sees him coordinate regularly with a range of stakeholders, from other consultants through to community groups.

Previously, John was a key member of the team working on the winning Echo Queens Wharf Casino bid and CUSP's international projects including the development of The Pearl Resort in Fiji. He also maintains his passion for private residential work, regularly working on high end gardens.

John uses his broad experience to approach everything with creativity and innovation. Through his work, John aims to demonstrate the value of landscape and create a sense of ownership which ensures the long-term success of any project.
